

## SAFETY DATA SHEET MAXIMARINE CYL 25

According to Regulation (EC) No 1907/2006, Annex II, as amended by Regulation (EU) No 453/2010

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

**Product name** MAXIMARINE CYL 25

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** Marine Engine Oil.

**Uses advised against** Use only for intended applications.

#### 1.3. Details of the supplier of the safety data sheet

**Supplier** PETROL OFİSİ A.Ş.  
Ünalan Mahallesi, Libadiye Caddesi No: 82F Kat: 2-3-4, 34700 Üsküdar/ İstanbul  
Tel: +90 850 339 1919  
Fax: +90 216 275 3854  
madeniyag@petrolofisi.com.tr

**Contact person** Customer Services: madeniyag@petrolofisi.com.tr

#### 1.4. Emergency telephone number

**Emergency telephone** Madeni Yağ Customer Services: 0850 339 1919 (working hours)

**National emergency telephone number** National Poison Consultance Center: 114 Emergency Medical Services: 112

### SECTION 2: Hazards identification

#### 2.1. Classification of the substance or mixture

##### Classification (EC 1272/2008)

**Physical hazards** Not Classified

**Health hazards** Not Classified

**Environmental hazards** Not Classified

#### 2.2. Label elements

**Hazard statements** NC Not Classified

#### 2.3. Other hazards

### SECTION 3: Composition/information on ingredients

#### 3.2. Mixtures

|                                                               |                      |                                                  |
|---------------------------------------------------------------|----------------------|--------------------------------------------------|
| <b>Distillates (petroleum), hydrotreated heavy paraffinic</b> |                      | <b>40-60%</b>                                    |
| CAS number: 64742-54-7                                        | EC number: 265-157-1 | REACH registration number: 01-2119484627-25-0033 |

The full text for all hazard statements is displayed in Section 16.

### Composition comments

The DMSO contents of some substances are classified by the manufacturer as <3% according to IP 346. Highly refined mineral oil (C15-50):  
Includes one or more of following EINECS numbers: 265-090-8, 265-091-3, 265-096-0, 265-097-6, 265-098-1, 265-101-6, 265-155-0, 265-156-6, 265-157-1, 265-158-7, 265-159-2, 265-160-8, 265-166-0, 265-169-7, 265-176-5, 276-736-3, 276-737-9, 276-738-4, 278-012-2.  
Includes one or more of following REACH record numbers: 1-2119488706-23, 01-2119487067-30, 01-2119487081-40, 01-2119483621-38, 01-2119480374-36, 01-2119488707-21, 01-2119467170-45, 01-2119480375-34, 01-2119484627-25, 01-2119480132-48, 01-2119487077-29, 01-2119489287-22, 01-2119480472-38, 01-2119471299-27, 01-2119485040-48, 01-2119555262-43, 01-2119495601-36, 01-2119474889-13, 01-2119474878-16.

### Ingredient notes

See Section 8 for occupational exposure limits.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

|                                   |                                                                                                                                                                                        |
|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General information</b>        | Treat symptomatically.                                                                                                                                                                 |
| <b>Inhalation</b>                 | Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Get medical attention if symptoms are severe or persist. |
| <b>Ingestion</b>                  | Do not induce vomiting due to the risk of obstructing the respiratory tracts. Give nothing by mouth in case of consciousness loss and obtain medical attention immediately.            |
| <b>Skin contact</b>               | Treat symptomatically.                                                                                                                                                                 |
| <b>Eye contact</b>                | Treat symptomatically.                                                                                                                                                                 |
| <b>Protection of first aiders</b> | First aid personnel should wear appropriate protective equipment during any rescue.                                                                                                    |

### 4.2. Most important symptoms and effects, both acute and delayed

|                            |                        |
|----------------------------|------------------------|
| <b>General information</b> | Treat symptomatically. |
|----------------------------|------------------------|

## MAXIMARINE CYL 25

|                     |                                                                                                                                                                                                                                                                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalation</b>   | Not expected to be harmful if inhaled. Contains petroleum based mineral oil. Oil vapor may cause respiratory irritation or other pulmonary effects if inhaled prolonged or repeated by air at levels above the recommended mineral oil vapor exposure limit. Symptoms of respiratory irritation may include coughing and difficulty breathing. |
| <b>Ingestion</b>    | No specific symptoms known.                                                                                                                                                                                                                                                                                                                    |
| <b>Skin contact</b> | May cause sensitisation or allergic reactions in sensitive individuals.                                                                                                                                                                                                                                                                        |
| <b>Eye contact</b>  | May cause skin sensitisation or allergic reactions in sensitive individuals.                                                                                                                                                                                                                                                                   |

### **4.3. Indication of any immediate medical attention and special treatment needed**

|                             |                        |
|-----------------------------|------------------------|
| <b>Notes for the doctor</b> | Treat symptomatically. |
| <b>Specific treatments</b>  | Treat symptomatically. |

## **SECTION 5: Firefighting measures**

### **5.1. Extinguishing media**

|                                       |                                                                        |
|---------------------------------------|------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Extinguish with foam, carbon dioxide, dry powder or water fog.         |
| <b>Unsuitable extinguishing media</b> | Do not use water jet as an extinguisher, as this will spread the fire. |

### **5.2. Special hazards arising from the substance or mixture**

|                                      |                                                                                                                                                                                                  |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Specific hazards</b>              | Not known.                                                                                                                                                                                       |
| <b>Hazardous combustion products</b> | A complex mixture of airborne solids, liquids and gases can be released. Carbon dioxide (CO <sub>2</sub> ). Carbon monoxide (CO). Unidentified organic or inorganic compounds. Sulphur. Calcium. |

### **5.3. Advice for firefighters**

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Protective actions during firefighting</b>        | This product is flammable even if it is not easily ignited. Refer to Section 7 for proper handling and storage. In case of insufficient ventilation, wear the required breathing apparatus. Dispose of fire debris and contaminated fire-fighting water in accordance with applicable legal legislation. No action shall be taken without appropriate training or involving any personal risk. |
| <b>Special protective equipment for firefighters</b> | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Use protective equipment appropriate for surrounding materials.                                                                                                                                                                                                                          |

## **SECTION 6: Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

|                                    |                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Ensure procedures and training for emergency decontamination and disposal are in place. No action shall be taken without appropriate training or involving any personal risk. No smoking, sparks, flames or other sources of ignition near spillage. Wear protective clothing as described in Section 8 of this safety data sheet. |
| <b>For non-emergency personnel</b> | Necessary precautions should be taken to ensure that non-educated personnel do not intervene.                                                                                                                                                                                                                                      |

## MAXIMARINE CYL 25

**For emergency responders** Wear protective clothing as shown in section 8 of this safety data sheet. Notification: In case of spillage, notify the local authorities as appropriate or as necessary. Stop the leakage source if it can be done without risk. Limit spillage to prevent further contamination of soil, surface or ground water. Remove any spilled material as soon as possible by following the precautions in the section Exposure Controls / Personal Protection. Use suitable techniques such as non-flammable absorbent materials or pumping. When possible or appropriate, remove the contaminated soil from the area. Place contaminated products in disposable boxes and dispose of in accordance with regulations. If a heated material is spilled, allow it to cool before handling with disposal methods. Proper ventilation should be provided.

### 6.2. Environmental precautions

**Environmental precautions** Apply protective methods to prevent spilled material from entering into water sources, water channels, sewers and soil.

### 6.3. Methods and material for containment and cleaning up

**Methods for cleaning up** Large spill : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water sources, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Small spill : Stop leak if without risk. Move containers from spill area. Absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

### 6.4. Reference to other sections

**Reference to other sections** For personal protection, see Section 8. For waste disposal, see Section 13. See Section 1 for emergency contact information. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. See Section 7 for more information on safe handling.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

**Usage precautions** Prevent soil contamination or spillage into sewage systems and water. Wear protective equipment as directed in Section 8 of this safety data sheet for proper personal protection. Good ventilation should be provided in the working environment and inhalation of vapor generated during use should be avoided. Skin contact should be avoided and hygienic rules should be followed. Eye contact should be avoided. Wear goggles or a face mask to prevent eye contact. Avoid eating, drinking and smoking while using. Use disposable clothing. Static hazard: Electrostatic charge may accumulate when working on it. Tying or grounding may be required to minimize this risk. Review all processes that have the potential to create and collect electrostatic charge and / or flammable atmospheres, and follow the relevant mitigation practices.

**Advice on general occupational hygiene** Do not eat, drink or smoke when using this product. Eye wash facilities and emergency shower must be available when handling this product. Good personal hygiene procedures should be implemented.

### 7.2. Conditions for safe storage, including any incompatibilities

**Storage precautions** The container is not designed to contain pressure. Do not apply pressure to discharge the container otherwise it may rupture with explosive force. Empty containers may contain product residue and it can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, sparks, static electricity or other sources of ignition. Containers should be drained completely and disposed of properly.

## MAXIMARINE CYL 25

**Storage class** Chemical storage.

### 7.3. Specific end use(s)

**Specific end use(s)** The identified uses for this product are detailed in Section 1.2.

**Usage description** The product must be used as specified in the data sheet.

## SECTION 8: Exposure controls/Personal protection

### 8.1. Control parameters

#### Occupational exposure limits

**Distillates (petroleum), hydrotreated heavy paraffinic**

Oil mist: TWA: 5 mg/m<sup>3</sup> (ACGIH). In no case should this limit be exceeded or the local limit, if it is more restrictive.

**Yüksek düzeyde rafine edilmiş madeni yağ (C15- C50)**

Mineral Oil; TWA: 5 mg/m<sup>3</sup> , ACGIH (United States)

Mineral oil: ACGIH, STEL:10 mg/m<sup>3</sup>

**Ingredient comments** No other information known.

**Biological limit values** No other information known.

**DNEL** No other information known.

**DMEL** No other information known.

**PNEC** No other information known.

### Highly refined mineral oil (CAS: 64742-01-4)

**Ingredient comments** Oil Mist TWA: 5 mg /m<sup>3</sup> (ACGIH).

### 8.2. Exposure controls

#### Protective equipment

#### Appropriate engineering controls

When determining engineering controls and when choosing personal protection equipment, consider the possible risks of this substance (see Section 2), appropriate exposure limits, business activities and other substances in the workplace. If engineering controls and work practices are not sufficient to prevent exposure to harmful levels of this substance, the use of personal protective equipment as described in this section is recommended. Ensure good ventilation. Eye / face washing units and safety showers should be installed close to the work area for use in case of emergency, injury and exposure.

#### Personal protection

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

#### Eye/face protection

Chemical splash goggles or face shield.

#### Hand protection

Wear protective gloves.

#### Other skin and body protection

Avoid contact with skin.

#### Hygiene measures

Good personal hygiene procedures should be implemented.

#### Respiratory protection

Use appropriate respiratory protection if there is the potential to exceed the exposure limits.

## MAXIMARINE CYL 25

|                                        |                                                                                                                                                             |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Thermal hazards</b>                 | If there is a risk of contact with hot product, all protective equipment worn should be suitable for use with high temperatures.                            |
| <b>Environmental exposure controls</b> | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. |

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

|                                                     |                                      |
|-----------------------------------------------------|--------------------------------------|
| <b>Appearance</b>                                   | Viscous liquid.                      |
| <b>Colour</b>                                       | Brown.                               |
| <b>Odour</b>                                        | Characteristic.                      |
| <b>Odour threshold</b>                              | No specific test data are available. |
| <b>pH</b>                                           | Scientifically unjustified.          |
| <b>Melting point</b>                                | No specific test data are available. |
| <b>Initial boiling point and range</b>              | No specific test data are available. |
| <b>Flash point</b>                                  | > 220°C Cleveland open cup.          |
| <b>Evaporation rate</b>                             | No specific test data are available. |
| <b>Evaporation factor</b>                           | No specific test data are available. |
| <b>Flammability (solid, gas)</b>                    | No specific test data are available. |
| <b>Upper/lower flammability or explosive limits</b> | No specific test data are available. |
| <b>Other flammability</b>                           | No specific test data are available. |
| <b>Vapour pressure</b>                              | No specific test data are available. |
| <b>Vapour density</b>                               | No specific test data are available. |
| <b>Relative density</b>                             | No specific test data are available. |
| <b>Bulk density</b>                                 | ~ 0,91 g/ml                          |
| <b>Solubility(ies)</b>                              | Insoluble in water.                  |
| <b>Partition coefficient</b>                        | No specific test data are available. |
| <b>Auto-ignition temperature</b>                    | No specific test data are available. |
| <b>Decomposition Temperature</b>                    | No specific test data are available. |
| <b>Viscosity</b>                                    | min. 18,5 cSt @ 100°C                |
| <b>Explosive properties</b>                         | No specific test data are available. |
| <b>Explosive under the influence of a flame</b>     | Not considered to be explosive.      |
| <b>Oxidising properties</b>                         | Not known.                           |
| <b>Comments</b>                                     | No other information known.          |

#### 9.2. Other information

|                          |                                      |
|--------------------------|--------------------------------------|
| <b>Other information</b> | No information required.             |
| <b>Refractive index</b>  | No specific test data are available. |

## MAXIMARINE CYL 25

|                                  |                                      |
|----------------------------------|--------------------------------------|
| <b>Particle size</b>             | No specific test data are available. |
| <b>Molecular weight</b>          | No specific test data are available. |
| <b>Volatility</b>                | No specific test data are available. |
| <b>Saturation concentration</b>  | No specific test data are available. |
| <b>Critical temperature</b>      | No specific test data are available. |
| <b>Volatile organic compound</b> | No specific test data are available. |

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

|                   |                                                                                                        |
|-------------------|--------------------------------------------------------------------------------------------------------|
| <b>Reactivity</b> | It can react with strong oxidizing chemicals such as strong acids or chlorate, nitrate, peroxide, etc. |
|-------------------|--------------------------------------------------------------------------------------------------------|

#### 10.2. Chemical stability

|                  |                                                                                                                                  |
|------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Stability</b> | This material is considered stable under normal environmental conditions and in the conditions of storage and handling foreseen. |
|------------------|----------------------------------------------------------------------------------------------------------------------------------|

#### 10.3. Possibility of hazardous reactions

|                                           |                                                                                |
|-------------------------------------------|--------------------------------------------------------------------------------|
| <b>Possibility of hazardous reactions</b> | Under normal conditions of storage and use, no hazardous reactions will occur. |
|-------------------------------------------|--------------------------------------------------------------------------------|

#### 10.4. Conditions to avoid

|                            |                |
|----------------------------|----------------|
| <b>Conditions to avoid</b> | Not available. |
|----------------------------|----------------|

#### 10.5. Incompatible materials

|                           |                |
|---------------------------|----------------|
| <b>Materials to avoid</b> | Not available. |
|---------------------------|----------------|

#### 10.6. Hazardous decomposition products

|                                         |            |
|-----------------------------------------|------------|
| <b>Hazardous decomposition products</b> | Not known. |
|-----------------------------------------|------------|

### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

|                              |                                                                               |
|------------------------------|-------------------------------------------------------------------------------|
| <b>Toxicological effects</b> | Information given is based on data of the components and of similar products. |
|------------------------------|-------------------------------------------------------------------------------|

|                             |                                                                               |
|-----------------------------|-------------------------------------------------------------------------------|
| <b>Other health effects</b> | Information given is based on data of the components and of similar products. |
|-----------------------------|-------------------------------------------------------------------------------|

#### Acute toxicity - oral

|                |                                                                               |
|----------------|-------------------------------------------------------------------------------|
| <b>Summary</b> | Information given is based on data of the components and of similar products. |
|----------------|-------------------------------------------------------------------------------|

|                                     |                                                                               |
|-------------------------------------|-------------------------------------------------------------------------------|
| <b>Notes (oral LD<sub>50</sub>)</b> | Information given is based on data of the components and of similar products. |
|-------------------------------------|-------------------------------------------------------------------------------|

#### Acute toxicity - dermal

|                |                                                                               |
|----------------|-------------------------------------------------------------------------------|
| <b>Summary</b> | Information given is based on data of the components and of similar products. |
|----------------|-------------------------------------------------------------------------------|

|                                       |                                                                               |
|---------------------------------------|-------------------------------------------------------------------------------|
| <b>Notes (dermal LD<sub>50</sub>)</b> | Information given is based on data of the components and of similar products. |
|---------------------------------------|-------------------------------------------------------------------------------|

#### Acute toxicity - inhalation

|                |                                                                               |
|----------------|-------------------------------------------------------------------------------|
| <b>Summary</b> | Information given is based on data of the components and of similar products. |
|----------------|-------------------------------------------------------------------------------|

|                                           |                                                                               |
|-------------------------------------------|-------------------------------------------------------------------------------|
| <b>Notes (inhalation LC<sub>50</sub>)</b> | Information given is based on data of the components and of similar products. |
|-------------------------------------------|-------------------------------------------------------------------------------|

#### Skin corrosion/irritation

|                |                                                                               |
|----------------|-------------------------------------------------------------------------------|
| <b>Summary</b> | Information given is based on data of the components and of similar products. |
|----------------|-------------------------------------------------------------------------------|

## MAXIMARINE CYL 25

|                                                                  |                                                                               |
|------------------------------------------------------------------|-------------------------------------------------------------------------------|

| <b>Summary</b>                          | Information given is based on data of the components and of similar products. |
| <b>Aspiration hazard</b>                | Information given is based on data of the components and of similar products. |
| <b>Toxicokinetics</b>                   | Information given is based on data of the components and of similar products. |
| <b>General information</b>              | Information given is based on data of the components and of similar products. |
| <b>Inhalation</b>                       | Information given is based on data of the components and of similar products. |
| <b>Ingestion</b>                        | Information given is based on data of the components and of similar products. |
| <b>Skin contact</b>                     | Information given is based on data of the components and of similar products. |
| <b>Eye contact</b>                      | Information given is based on data of the components and of similar products. |
| <b>Acute and chronic health hazards</b> | Information given is based on data of the components and of similar products. |
| <b>Route of exposure</b>                | Information given is based on data of the components and of similar products. |
| <b>Target organs</b>                    | Information given is based on data of the components and of similar products. |
| <b>Medical symptoms</b>                 | Information given is based on data of the components and of similar products. |
| <b>Medical considerations</b>           | Information given is based on data of the components and of similar products. |

### Toxicological information on ingredients.

#### Distillates (petroleum), hydrotreated heavy paraffinic

##### Acute toxicity - oral

**Notes (oral LD<sub>50</sub>)** LD<sub>50</sub> >2000 mg/kg, Oral,

##### Acute toxicity - dermal

**Notes (dermal LD<sub>50</sub>)** LD<sub>50</sub> >2000 mg/kg, Dermal,

##### Carcinogenicity

**Summary** The base oils in the product content contain less than 3% DMSO according to IP 346.

#### Highly refined mineral oil

##### Acute toxicity - oral

**Notes (oral LD<sub>50</sub>)** LD<sub>50</sub> >2000 mg/kg, Oral,

##### Acute toxicity - dermal

**Notes (dermal LD<sub>50</sub>)** LD<sub>50</sub> >2000 mg/kg, Dermal,

### SECTION 12: Ecological information

**Ecotoxicity** This substance is not expected to be harmful to aquatic organisms. The product has not been tested. The expression is derived from the properties of each component.

### Ecological information on ingredients.

#### Distillates (petroleum), hydrotreated heavy paraffinic

**Ecotoxicity** May be harmful to aquatic organisms. Spills form film layer on water surface and prevent oxygen transfer

### 12.1. Toxicity

## MAXIMARINE CYL 25

**Toxicity** This substance is not expected to be harmful to aquatic organisms. The product has not been tested. The expression is derived from the properties of each component.

### Acute aquatic toxicity

**Summary** Information given is based on data of the components and of similar products.

**Acute toxicity - fish** Information given is based on data of the components and of similar products.

**Acute toxicity - aquatic invertebrates** Information given is based on data of the components and of similar products.

**Acute toxicity - aquatic plants** Information given is based on data of the components and of similar products.

**Acute toxicity - microorganisms** Information given is based on data of the components and of similar products.

**Acute toxicity - terrestrial** Information given is based on data of the components and of similar products.

### Chronic aquatic toxicity

**Summary** Information given is based on data of the components and of similar products.

**Chronic toxicity - fish early life stage** Information given is based on data of the components and of similar products.

**Short term toxicity - embryo and sac fry stages** Information given is based on data of the components and of similar products.

**Chronic toxicity - aquatic invertebrates** Information given is based on data of the components and of similar products.

**Toxicity to soil** Information given is based on data of the components and of similar products.

**Toxicity to terrestrial plants** Information given is based on data of the components and of similar products.

### 12.2. Persistence and degradability

**Persistence and degradability** Information given is based on data of the components and of similar products.

**Phototransformation** Information given is based on data of the components and of similar products.

**Stability (hydrolysis)** Information given is based on data of the components and of similar products.

**Biodegradation** Information given is based on data of the components and of similar products.

**Biological oxygen demand** Information given is based on data of the components and of similar products.

**Chemical oxygen demand** Information given is based on data of the components and of similar products.

### Ecological information on ingredients.

#### Distillates (petroleum), hydrotreated heavy paraffinic

**Biodegradation** Not expected to be readily biodegradable.

### 12.3. Bioaccumulative potential

**Bioaccumulative potential** Information given is based on data of the components and of similar products.

**Partition coefficient** No specific test data are available.

### Ecological information on ingredients.

#### Distillates (petroleum), hydrotreated heavy paraffinic

**Bioaccumulative potential** Potentially bioaccumulating.

### 12.4. Mobility in soil

## MAXIMARINE CYL 25

|                                          |                                                                               |
|------------------------------------------|-------------------------------------------------------------------------------|
| <b>Mobility</b>                          | Information given is based on data of the components and of similar products. |
| <b>Adsorption/desorption coefficient</b> | Information given is based on data of the components and of similar products. |
| <b>Henry's law constant</b>              | Information given is based on data of the components and of similar products. |
| <b>Surface tension</b>                   | Information given is based on data of the components and of similar products. |

### Ecological information on ingredients.

#### Distillates (petroleum), hydrotreated heavy paraffinic

|                 |                                                                                                                     |
|-----------------|---------------------------------------------------------------------------------------------------------------------|
| <b>Mobility</b> | Liquid under most environmental conditions. Floats on water. If spread into ground the groundwater may be polluted. |
|-----------------|---------------------------------------------------------------------------------------------------------------------|

### 12.5. Results of PBT and vPvB assessment

|                                           |                                                                         |
|-------------------------------------------|-------------------------------------------------------------------------|
| <b>Results of PBT and vPvB assessment</b> | This product does not contain any substances classified as PBT or vPvB. |
|-------------------------------------------|-------------------------------------------------------------------------|

### 12.6. Other adverse effects

|                              |                                                                               |
|------------------------------|-------------------------------------------------------------------------------|
| <b>Other adverse effects</b> | Information given is based on data of the components and of similar products. |
|------------------------------|-------------------------------------------------------------------------------|

## **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

|                            |                                                                                                                                                                                                                                                                                                                                                                                  |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General information</b> | The generation of waste should be minimised or avoided wherever possible.                                                                                                                                                                                                                                                                                                        |
| <b>Disposal methods</b>    | Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Collect and place in suitable waste disposal containers and seal securely. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. |
| <b>Waste class</b>         | The waste code classification is to be carried out according to the European Waste Catalogue (EWC).                                                                                                                                                                                                                                                                              |

## **SECTION 14: Transport information**

|                |                |
|----------------|----------------|
| <b>General</b> | Not regulated. |
|----------------|----------------|

### 14.1. UN number

Not applicable.

### 14.2. UN proper shipping name

Not applicable.

### 14.3. Transport hazard class(es)

No transport warning sign required.

### 14.4. Packing group

Not applicable.

### 14.5. Environmental hazards

#### **Environmentally hazardous substance/marine pollutant**

Not applicable.

### 14.6. Special precautions for user

## MAXIMARINE CYL 25

Not applicable.

### 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not applicable.

### **SECTION 15: Regulatory information**

#### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

|                             |                                                                                                                                                                                                                                                                                                       |
